

Make your own donation box

You can make your own donation box by using any robust box available, such as an ice cream box. Simply scrap off its existing labels and print off some of UNICEF's pictures to stick to the sides. *Voila!* You have your very own donation box!

Raise \$95 and you can provide vaccines for 200 children in India to stop them contracting measles, a deadly disease.

Do!

- Put up a poster to show why you're collecting.
- Ask everyone you know to help you – invite them to your event, ask them to donate.
- Keep your box in a safe place, with someone looking after it at all times.
- Contact us if you need any tips or advice!

Don't!

- Leave your box unattended.
- Let it get too full without emptying and sending your money in.
- Use the box for street collections or other public charity collections.
